53184 7590 06/01/2007 i2 TECHNOLOGIES US, INC. ONE i2 PLACE, 11701 LUNA ROAD DALLAS, TX 75234			EXAMINER NGUYEN, CUONG H	
			ART UNIT 3661	PAPER NUMBER
			MAIL DATE 06/01/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.		Applicant(s)	
	09/858,322		TENORIO, MANOEL	
	Examiner		Art Unit	
	CUONG H. NGUYEN		3661	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 February 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10,27-36,41 and 43 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10,27-36,41,43 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3661

Status of the claims

1. Claims 1-10, 27-36, 41, and 43 are pending with the Response (2/27/07).

Response

2. The examiner respectfully maintains that because claimed "pointer" is an essential subject matter of this invention: independent claims 27 and 43 are directed to a software, independent claims 1, and 41 are directed to a system that mainly uses said claimed software (see pending independent claims 1, 27, 41, and 43) – representing by software instructions, therefore pending claims 1-10, 27-36, 41, and 43 contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that to duplicate this invention without trial and error.

According to the most relative of this "pointer" in the pending application's disclosure:

"Detail Description Paragraph:

[0026] In one embodiment, as described above, product data (at least product data more detailed than data provided by a taxonomy) and seller data are not stored in GCD 42, but are stored in databases 32. For example, a seller 30 may maintain a relational database 32 that includes a plurality of tables containing product attribute values for a variety of products and attribute values for seller 30 for each product, a set of products, or all of the products offered by seller 30. Product data and seller data may be integrated into one or more tables or may be segregated into different tables. Moreover, product

Art Unit: 3661

data and seller data for a seller 30 may be stored in the same or separate databases. For example, as described above, product data for seller 30 may be stored in seller database 32 while seller data for seller 30 may be stored in a central database accessible to server 40 that may contain seller data for a number of sellers 30. One or more pointers may be associated with each class to identify the location of one or more databases 32 that include product data and/or seller data for products contained in that class or to identify particular data in databases 32. Therefore, GCD 42 may execute a search for products in databases 32 identified by a pointer corresponding to a user-selected class (the class may instead be selected automatically in an appropriate manner). GCD 42 may also return the network location (such as a uniform resource locator (URL) or other network address) of the database 32 to buyer 20 so that buyer 20 may independently access database 32. Databases 32 may be searched using any appropriate method including, but not limited to, a structured query language (SQL) query.

Detail Description Paragraph:

[0029] When GCD 42 has performed a search of the databases 32 identified by a pointer or pointers associated with a class that buyer 20 has selected (or that has been selected automatically),

Art Unit: 3661

GCD 42 may return product data and possibly seller data associated with one or more products matching the search criteria. (Alternatively, search results may be communicated directly to buyer 20 from databases 32.) GCD 42 may integrate the product data and possibly seller data resulting from the search into directory structure 44 so that the data appears to buyer 20 as being part of GCD 42. GCD 42 may alternatively present the results of the search in any other appropriate manner. Each product resulting from the search may be an object which is unique instance of the class in which buyer 20 is searching. Furthermore, each such object (and its location) may be uniquely identified using a numbering scheme corresponding to directory structure 44.

Detail Description Paragraph:

[0038] A search interface 45, or any other appropriate component of GCD server 40, may facilitate such a request by searching or requesting searches of seller databases 32 identified by one or more pointers associated with felt-tip pens class 60b, as described above.”

According to those closest disclosures, the claimed item (“pointer”) is used to identifying a particular object – the disclosure does not provide sufficient details: how is it (“pointer”) made? What is that claimed “pointer”?

Art Unit: 3661

The CGI dictionary definition for a pointer:

"2. In programming, an address or an instruction to jump to another part of the data structure".

The examiner submits the closest Geek.com Glossary 's definition for a pointer in computer programming:

Pointer - (1) In programming, think of a pointer as an address. The address can point to just about anything, including another pointer. Ultimately, if you follow the trail of pointers you'll probably find some data--pointers are most often used to point to data. The purpose of pointers is so that when you are programming you can pass around a small address that points to some data, instead of passing the actual data around. (2) Pointers can also refer to the icon on the screen that you move around with a mouse or other pointing device. In a GUI environment you need a pointer to point to things so that you can select them.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-10, 27-36, 41, and 43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. These claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that to duplicate this invention without trial and error.

Claims 1-10, 27-36, 41, and 43 are rejected under 35 U.S.C. 112, first paragraph, because: they are essentially directed to a software imbedded in a computer-readable media and using in a system – even pending claims are directed to “system” because incorporating that specific software (a MUST) can be considered as a brain of this invention (while the submitted specification provides nothing to enable one with ordinary skill in the art to practice – non enablement); and the specification does not reasonably provide enablement of a claimed software for use in a claimed system. The specification does not enable any person skilled in the art to

Art Unit: 3661

which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims (the dependent claims of above independent claims are also rejected on 35 USC 112, 1st para. because they include above defective). The applicant only provides a very high level drawing (i.e., Fig. 5), not the essential codes and instructions – the subject matter of this invention - to make this invention.

4. Pending claims are still not patentable on 35 USC 112, 1st para statutory rejections. The arguments (2/27/2007) are unpersuasive. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose telephone number is 571-272-6759 (email address: cuong.nguyen@uspto.gov). The examiner can normally be reached on 9:30 am - 5:30 pm.

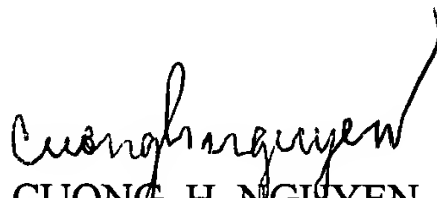

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

Art Unit: 3661

supervisor, THOMAS G. BLACK can be reached on 571-272-6956. The Rightfax number for the examiner where this application is assigned is 571-273-6759.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Please provide support, with page and line numbers, for any amended or new claim in an effort to help advance prosecution; otherwise any new claim language that is introduced in an amended or new claim may be considered as new matter, especially if the Application is a Jumbo Application.
